

Generation Marketing ERP

SUMMARY

Generation Marketing ERP is a centralized Enterprise Resource Planning (ERP) platform designed for marketing companies that perform customer calling, lead generation, sales closing, project execution, employee management, and client communication. The ERP integrates all departments into one platform, ensuring that every customer, employee, project, and client is connected through a structured workflow.

SYSTEM COMPONENTS

• Web ERP Portal • Android Application for Calling Agents • PostgreSQL Database • Google Drive Storage for Recordings and Documents

MAIN DEPARTMENTS

1. Super Admin 2. Admin 3. Calling Department 4. Sales Closing Department 5. Project Manager 6. Client Portal

FUTURE EXPANSION

• HR Management • Finance & Accounting • Payroll Management • AI Call Transcription • AI Call Summary • AI Sentiment Analysis • WhatsApp Integration • SMS Gateway • Email Automation • Customer Ticketing • Inventory Management • Multi-Branch Management • Multi-Tenant SaaS • Business Intelligence Dashboard

CONCLUSION

Generation Marketing ERP provides a unified workflow that connects all business departments—from lead generation to project delivery—on a single platform. The Web ERP manages administration and reporting, the Android application enables field calling operations, PostgreSQL securely stores structured business data, and Google Drive stores recordings and business documents. This modular architecture ensures scalability, maintainability, and efficient collaboration across all departments while providing complete visibility into every stage of the customer lifecycle.
